DESCRIPTION

Intralipid® 30% (a 30% I.V. Fat Emulsion) Pharmacy Bulk Package is a neutral triglyceride emulsion that provides approximately 3g of fat per kilogram of body weight when administered at a recommended maximum infusion rate of 0.125 g/kg/hour. The recommended maximum infusion rate is calculated based on the infant's ability to eliminate fat.

The ideal concentration of Intralipid® 30% (a 30% I.V. Fat Emulsion) Pharmacy Bulk Package is not intended for direct infusion. It is diluted as needed with compatible solutions such as fluid resuscitation solutions, dextrose, chloride, and/or plasma free fatty acid levels. If signs or poor tolerance are noted, the admixture should be discontinued.

The admixture must be prepared, infused, and stored as instructed. Failure to follow the Mixing Guidelines and Limitations section may result in unacceptable outcomes. See the Mixing Guidelines and Limitations section for information on how to mix Intralipid® 30% (a 30% I.V. Fat Emulsion) Pharmacy Bulk Package with other solutions.

Intralipid® 30% (a 30% I.V. Fat Emulsion) Pharmacy Bulk Package contains an antioxidant (α-lipoic acid), a source of amino acids, and a source of calories and essential fatty acids for patients requiring parenteral nutrition. Intralipid® 30% (a 30% I.V. Fat Emulsion) Pharmacy Bulk Package contains an antioxidant which is equivalent to 0.125 g/kg/hour.

Intralipid® 30% (a 30% I.V. Fat Emulsion) Pharmacy Bulk Package should be stored at controlled room temperature. Intralipid® 30% (a 30% I.V. Fat Emulsion) Pharmacy Bulk Package should be stored at 15°-30°C (59°-86°F).

Intralipid® 30% (a 30% I.V. Fat Emulsion) Pharmacy Bulk Package should be stored in an area free from direct sunlight. Intralipid® 30% (a 30% I.V. Fat Emulsion) Pharmacy Bulk Package should not be refrigerated.

**Instruction for Use - Intralipid 30% Pharmacy Bulk Package Container**

1. **The integrity indicator Oxalert™ A should be inspected before removing the overwrap. If the product is damaged, do not use.**

2. **Remove the overwrap by tearing at the notch and pulling down along the container. The Oxalert sachet (A) and the oxygen absorber (B) should be discarded. Place the bag on a clean, flat surface or hang on a support hook.**

3. **Break off the tamper-evident arrow flag from the blue infusion port.**

4. **Hang the bag in the hanger cut and start transfer to the compounding bag.**

5. **Hang the bag in the hanger cut and start transfer to the compounding bag.**

**NOTE:** Assure that the spike is inserted straight into the port and not at an angle.

Inspect the bag and contents for particulate matter in a well-lit environment prior to use. Check the bag if there are any signs of discoloration or particulates.
